

Frame Assembly Instructions

You will need:

- Phillips head screwdriver
- All supplied frame pieces

Before assembling, lay all pieces flat on the floor exactly as shown in the diagram below.

Parts Guide

- A – Top Horizontal Bar
- B – Left Vertical Side Bars (2 interconnecting parts)
- C – Right Vertical Side Bar (2 interconnecting parts)
- D – Bottom Horizontal Bar
- E – Connector Sections with Screw Fittings
- D – 2 x Legs

Assembly Steps

1. Lay all parts on the floor following the diagram.
2. Attached the interconnecting parts together for Part B, note this side has connector parts for the top and base of the frame..
3. Attached the interconnecting parts together for Part C, note this side has one connector part only which connects to the base.
4. Attach Parts B and C to Part A using the connector sections.
5. Secure each join with the supplied screws using a Phillips head screwdriver.
6. Attach Part D to complete the rectangle, securing the screws.
7. Tighten all screws firmly but do not overtighten.
8. Insert each leg into the bottom of the frame, tighten screws.
9. Once fully assembled, carefully lift the frame upright
